

OAK LODGE WATER SERVICES

BUDGET COMMITTEE

REGULAR MEETING

April 28, 2020

"Enhancing Our Community's Water Environment"

REMOTE MEETING of the BUDGET COMMITTEE

Committee Attendance by Zoom Video/Telephone

Public Attendance by Telephone Only

April 28, 2020 at 6:00 p.m.

1. Call to Order
2. Meeting Facilitation Protocols
3. Call for Public Comment

Members of the public are welcome to testify for a maximum of three minutes on each agenda item.

4. Consent Agenda
 - a. March 31, 2020 Budget Committee Meeting Minutes

5. Budget Message
6. Presentation of the Budget
7. Presentation of the Capital Improvement Plan

This presentation may begin or be completed at the next scheduled meeting depending on time.

8. Adjourn Regular Meeting

AGENDA ITEM

Title	Call for Public Comment
Item No.	3
Date	April 28, 2020

Summary

Members of the public are invited to identify agenda items on which they would like to comment or provide testimony. The Budget Committee may elect to limit the total time available for public comment or for any single speaker depending on meeting length.

CONSENT AGENDA

To Budget Committee
From Sarah Jo Chaplen, General Manager
Title Consent Agenda
Item No. 4
Date April 28, 2020

Summary

The Board of Directors has a standing item on the regular monthly meeting agenda called "Consent Agenda." It is proposed that the Budget Committee do the same for its regular business. This subset of the regular agenda provides for the Board to relegate routine business functions not requiring discussion to a consent agenda where all included items can be acted upon by a single act.

The Consent Agenda includes:

a. March 31, 2020 Budget Committee Meeting Minutes

Options for Consideration

1. Approve the Consent Agenda as listed on the meeting agenda.
2. Request one or more items listed on the Consent Agenda be pulled from the Consent Agenda for discussion.

Recommendation

Staff requests that the Budget Committee approve the items listed under the Consent Agenda.

Suggested Budget Committee Motion

"I move to approve the Consent Agenda."

Approved By _____	Date _____

**BUDGET COMMITTEE
[REMOTE] ORIENTATION MINUTES – 6:00 P.M.
MARCH 31, 2020**

Budget Committee – Members Present via Zoom:

Kevin Williams	Board of Directors
Paul Gornick	Board of Directors
Mark Knudson	Board of Directors
Susan Keil	Board of Directors
Ginny Van Loo	Board of Directors
John Klum	Citizen Representative
Amanda Gresen	Citizen Representative
Robert Weber	Citizen Representative
Ron Weigel	Citizen Representative
Joseph Healy	Citizen Representative

Budget Committee – Members Absent:

Ann-Marie Cordova	Citizen Representative - Alternate
-------------------	------------------------------------

Oak Lodge Water Services Staff – Present via Zoom:

Sarah Jo Chaplen	General Manager
Jason Rice	District Engineer
David Mendenhall	Plant Operations Manager
Aleah Binkowski-Burk	Human Resources/Payroll Manager
Todd Knapp	Field Operations Manager
Brad Lyon	Field Operations Supervisor
Laural Casey	District Recorder

Visitors and Consultants – Present via Zoom:

Rob Moody	Merina & Company, LLP
-----------	-----------------------

1. Call to Order

Director Williams called the meeting to order at 6:03 p.m. and thanked the Citizen Representatives for their commitment to Oak Lodge Services District especially during the current COVID-19 pandemic. Director Williams also acknowledged the efforts of General Manager Chaplen and District Recorder Casey to facilitate the remote meeting.

2. Meeting Facilitation Protocols

General Manager Chaplen asked District Recorder Casey to facilitate a roll call. District Recorder Casey facilitated the roll call of Budget Committee members, staff, and consultants to confirm a quorum.

General Manager Chaplen overviewed the general protocols of a virtual meeting due to the current COVID-19 pandemic. She detailed preparations made for the facilitation of the Budget Committee Orientation noting that Director Williams will facilitate the meeting and District

Recorder Casey will work with the member elected into the Chair position for facilitation of the next meeting.

3. Call for Public Comment

Director Williams asked District Recorder Casey if there were any members of the public in attendance. District Recorder Casey confirmed there were none.

4. Election of Budget Committee Officers

General Manager Chaplen overviewed the Budget Committee officer positions: Chair and Secretary/Vice Chair.

Director Keil moved to nominate Citizen Representative Klum as Budget Committee Chair and Citizen Representative Gresen as Budget Committee Secretary/Vice Chair; Director Knudson seconded. Director Williams called for a vote and asked District Recorder Casey to conduct a roll call vote. Voting Aye: Directors Williams, Gornick, Knudson, Keil, and Van Loo; Citizen Representatives Gresen, Weber, Weigel, and Healy. Abstaining: Citizen Representative Klum.

MOTION CARRIED

5. Consent Agenda

General Manager Chaplen asked that the Budget Committee adopt the Consent Agenda including the two sets of meeting minutes from the last budget year.

Citizen Representative Klum moved to accept the minutes; Director Knudson seconded. Director Williams called for a vote and asked District Recorder Casey to conduct a roll call vote. Voting Aye: Directors Williams, Gornick, Knudson, Keil, and Van Loo; Citizen Representatives Klum, Gresen, Weber, Weigel, and Healy.

MOTION CARRIED

Director Keil clarified the pronunciation of Citizen Representative Klum's name. Citizen Representative Gresen offered the correct pronunciation of her name as well.

6. Orientation Presentation

Director Williams commended Financial Consultant Moody on his excellent work implementing policies and resolving financial issues.

Financial Consultant Moody overviewed the orientation agenda and discussed the tremendous change within the District since consolidation and the culture of strength that has ensued. He provided a general overview of the current fiscal year including updates on the financial and non-revenue water audits.

Director Van Loo asked if the District had reached out to former employees to prepare for an emergency staffing situation. Plant Operations Manager Mendenhall confirmed that he is in contact with a former employee about the matter. Director Van Loo stated that her husband, who worked for Water Environment Services, is willing to help the District in an emergency.

Director Keil addressed the financial audit and stated that the District is now following good business practices. Director Williams and Director Knudson agreed.

Director Knudson clarified the amount of non-revenue water that had been identified and the amount that could be recovered. General Manager Chaplen added that no water provider can recover all non-revenue water and that there will always be some level of loss, but that the audits are allowing the District to identify business processes that can be improved upon.

Financial Consultant Moody commented on the financial stability of the District noting that there is no reason for alarm due to the current COVID-19 pandemic. He discussed process refinement and the accounting of everyday processes within the District, as well as overviewed the 2020/2021 budget goals.

Director Keil commented on the current capital improvement bond for the treatment plant verifying that it is being funded by current revenue in the operating fund. Financial Consultant Moody confirmed.

Citizen Representative Weigel asked how the non-revenue water estimation is calculated. Financial Consultant Moody explained how non-revenue water is analyzed and the mixture of different scenarios that can account for the District's current non-revenue water amount.

Citizen Representative Weigel inquired about the exact percentage of District water loss. General Manager Chaplen explained that the American Water/Wastewater Association has advised the District to not calculate the straight percentage of loss, but to calculate the amount and source of non-revenue water that is appropriate for the District. Director Keil noted that the current non-revenue water is higher than expected stating that the incoming water meter has been verified to be correct and that the outgoing water meters are being sampled and tested.

Director Knudson asked about the Public Employees Retirement System (PERS) interest rate changes due to the financial implications of the COVID-19 pandemic. Financial Consultant Moody discussed interest rates stating that it is not clear what changes will need to be made. Director Keil asked for clarification to be made on how the PERS interest rates affect the District. Financial Consultant Moody discussed the liability of the District for current and former employees that is actuarially assessed. General Manager Chaplen added that the District's PERS rates are likely to grow due to the various high tiered employees due to the fortunate longevity of District employees.

Director Williams asked if the financial impact of the Water Master Plan would be included in the proposed budget. Financial Consultant Moody stated that the anticipated capital funding is included in the proposed 2020/2021 budget. District Engineer Rice overviewed the simultaneous work on the non-revenue water audit and the Water Master Plan noting that the plan will not be completed until after there have been budget conversations.

Citizen Representative Klum inquired about the new residential meters asking if non-revenue water has been identified due to the improved accuracy. District Engineer Rice stated that there has not been a clear indicator that the residential meters are the source of significant water loss but noted that testing of the residential and commercial meters is ongoing and more information is being gathered. General Manager Chaplen clarified that only the small meters have been replaced at this time. District Engineer Rice indicated that the large meters have been replaced

in the recent past [due to the equipped radio read technology] and were much newer than the residential meters. He noted that testing will indicate if large meters need to be replaced.

Director Gornick asked if the capital improvement placeholder was included in the 2019/2020 budget. District Engineer Rice confirmed and explained that the amounts were estimated and that the exact amount is included in the 2020/2021 proposed budget.

District Recorder Casey noticed Citizen Representative Weigel was missing from the meeting at 7:12 p.m. and paused the meeting to facilitate technical assistance. District Engineer Rice updated the Committee that Citizen Representative Weigel had another appointment to attend and Director Williams reconvened the meeting at 7:17 p.m.

Financial Consultant Moody continued his presentation overviewing the long-term projection model being used for years 2021-2026 noting that labor negotiations are not projected.

Director Keil asked what percent of water and sewer revenue is residential versus commercial. Financial Consultant Moody replied that he did not have that information but would provide that answer to the Board.

Director Keil inquired whether there had been a sewer rate study as part of a previous master plan. District Engineer Rice confirmed that a sewer rate study was completed before consolidation and the District would need a new model to accommodate the consolidated funds. Director Keil noted that the model would need updated information, but reflected proper drivers, cost tracking, and allocation methodology. District Engineer Rice agreed that the model would need updated information and that the model would not address the addition of the water fund. He noted that there would not be much difference between updating the old model or creating a new model. General Manager Chaplen added that part of the upcoming Sanitary Master Plan would be to assess what needed to be adjusted. Director Keil acknowledged that there have been organizational changes that need to be addressed but stressed that the methodology of the previous sewer rate study was solid. She called for equally robust surveys for water and asked if surface water was included in the sanitary rate study. District Engineer Rice explained that water, sewer, and surface water were separate funds and explained that the outcome of any discussions with a survey modeler would not be completed before the 2020/2021 budget adoption. Director Keil believed that the model would be helpful in creating an accurate report of all the services the District provides. District Engineer Rice agreed that further discussion would be needed.

The Budget Committee recessed for a short break at 7:34 p.m. and reconvened at 7:41 p.m.

Financial Consultant Moody overviewed governmental budgeting and reporting for members who have not previously served on the Budget Committee including budget law, the purpose of a budget, and the roles and responsibilities of everyone involved in the budget process. He summarized the rules and requirements, discussed internal aspects of the budget and allocating funds, reviewed different budget philosophies, and detailed the sliding scale of trust and control between the Board and staff.

Director Gornick inquired about the transparency of the budget development process before the Budget Committee receives the proposed budget. Financial Consultant Moody agreed that there is less transparency before being presented to the Budget Committee noting that the proposed

budget is compiled from various sources using a projection model that is presented to the committee upon presentation of the proposed budget.

Financial Consultant Moody spoke to the importance of reviewing trends and capital projects including how each are integrated into the budget. He discussed the reasoning behind the creation of the administrative services fund in the 2019/2020 budget.

Director Keil asked how legal services are budgeted. Financial Consultant Moody explained that legal services are allocated based on the type of service provided by department.

Financial Consultant Moody discussed the year end fund true-up between the water, wastewater, and storm funds. Director Keil asked what needs to be equalized. Financial Consultant Moody explained the calculation and adjustments that occur in a true-up.

Financial Consultant Moody discussed the budget timeline. Director Keil asked when the budget would be available to the public and when public comment would be taken. Financial Consultant Moody replied that public comment would begin to be taken during the April 28, 2020 meeting. General Manager Chaplen answered that the public would receive the budget on or after April 28, 2020. Director Keil inquired when the rates would be adopted. Financial Consultant Moody responded that there have been conversations surrounding rates and potential increases. He noted that the Finance Subcommittee would be discussing rate timelines and while there is not currently a good answer, he noted staff sensitivity to the matter.

Director Knudson noted the importance of understanding the revenue requirements of the budget before adoption and the need to recognize the relationship between rates and the budget. District Engineer Rice added that the rate can be determined by the budget conversation.

Financial Consultant Moody discussed the execution of the budget including monthly compliance and budget adjustments.

Citizen Representative Weber asked if the proposed budget would be provided to the Budget Committee in advance of the next meeting. Financial Consultant Moody confirmed that the proposed budget will be provided in accordance with local budget law and with enough time for Committee preparation.

Director Keil asked that meeting audio recording be available to the Budget Committee members who did not attend the meeting. District Recorder Casey agreed to facilitate the request.

7. Call for Public Comment

Director Williams asked District Recorder Casey if there were any members of the public in attendance. District Recorder Casey confirmed there were none.

8. Adjourned Regular Meeting

Director Williams adjourned at 8:23 p.m.

Respectfully submitted,

John Klum

Budget Message

Members of the Oak Lodge Water Services District Board, Citizen Members of the Budget Committee, and Residents of our District---submitted for your information is the 2020-2021 budget. The following pages highlight aspects of the District's budget based on current state and as influenced by prior periods as well as our vision of the coming year and beyond.

State of the District

Physics tells us for every action there is an equal and opposite reaction. Life shows us that for every challenge there is an opportunity. Oak Lodge Water Services District (District) is positioning to address our challenges straight up in the coming year, and take full advantage of opportunities for our customers, team members, and our community. The proposed budget for fiscal year 2020-21 is an illustration of that position and our commitment to success.

Since the beginning of the District, we have implemented the goals of our Board of Directors and adjusted to priorities dictated by changes in the business environment and the local and national economies. We have continued to provide a high level of service to our customers in the form of water quality, reliable wastewater collection and treatment, watershed protection, and exceptional customer service. While faced with the recent and unprecedented reality of COVID-19, we have continued to meet the needs and wants of our customers and protect our team members to the best of our abilities.

The 2020-2021 Budget

The 2020-21 budget reflects the current policy direction of our Board of Directors. That direction is clear in providing high-quality, reliable service at a reasonable cost to rate payers. The budget reflects a stable level of service in the coming fiscal year without significant changes in operations. Our capital plans and initiatives drive spending in each of the next few years (see the Capital Improvement Plan section of the budget) as we continue to address the needs of an aging collections and distribution infrastructure. Personnel services and materials and services costs are relatively consistent with the prior year's budget and estimated actual expenditures through June 30, 2020.

The budget is a comprehensive document containing detailed revenues and expenditures for all funds operated by the District. The operating and capital budgets contained within this document have been prepared in accordance with Oregon Local Budget Law, per Oregon Revised Statutes (ORS) 294.305 to 294.565, the State Rules for (ORS) Chapter 264 Water Districts, (ORS) Chapter 450 Sanitary Districts, and (ORS) Chapter 198 Special Districts. The budget represents a prudent

and fiscally responsible financial plan for District operations and capital improvements during the next fiscal year and establishes a base for several years beyond.

Summary Overview

This budget has had extensive analysis and scrutiny and will continue to position the District as a solid, forward-thinking, fiscally responsible organization within our community. The following summary highlights specific items contained in the 2020-2021 budget, and estimated effects on rates.

Financial Policies

The District's suite of financial policies approved by the Board have been applied to the 2020-21 budget. The District places emphasis on our maintenance of appropriate fund balances and reserves in operating funds (Administrative Services, Drinking Water, Wastewater, and Watershed Protection Funds). Operating funds have budgeted contingencies to cover unexpected and unknown items, as well as transfers to cover debt service, and to capital funds for current and future construction, major maintenance, or replacement of infrastructure. While the District does not budget for full cost recovery related to depreciation of District assets, we have provided for consideration of vehicles and equipment replacement in future years.

When considering the overall resources of the District, fund balances and reserves combine to provide one leg of a three-legged approach; with the other two legs being rates and financing. When managed together, they provide a stable strategy for operations and the acquisition and replacement of capital assets. The District is now actively managing fund balances and reserves while projecting costs and rates well into the future. The result of this foresight is a smoothing of rate impacts to our community and a proactive, thoughtful approach to managing our systems.

Personnel Services Estimates

The District is currently in negotiations with the AFSCME bargaining unit representing the administrative and operations team members on a contract to begin July 1, 2020. Therefore, the budget for the 2020-21 fiscal year does not reflect a cost of living adjustment (COLA) or other costs that may result from those negotiations.

The rates identified in this budget for the Public Employees Retirement System (PERS) are consistent with the prior year as rates are established and set on a biennial basis, and the 2020-21 fiscal year is the second year of the biennium. There is no certainty in rates beyond this biennium, though we expect substantial changes in the future based on current economic conditions

The current economic downturn (some are already calling it a recession) resulting from our country's response to the COVID-19 pandemic will undoubtedly affect PERS rates here in Oregon in the next biennium. With the lag in establishing rates inherent in a biennial process, current changes in the market and investments of PERS that fund benefits drive change in the unfunded actuarial liabilities of individual members. As the value of investments drops, the gap between those investments and the future benefit costs (the unfunded actuarial liability) grows. Historically, the only real approach to closing that gap is with employer rates, which we expect to increase going into the 2021-22 fiscal year. The amount of increase is currently unknown as PERS is currently in a valuation cycle.

During the 2019-20 fiscal year the District made a lump sum contribution of \$300,000 to “buy down” our unfunded actuarial liability. The 2020-21 budget includes an additional \$900,000 contribution to PERS for the same purpose. The total \$1.2M contribution was initially identified to maximize the District’s leverage to receive funding from a State-funded program to reduce the unfunded actuarial liabilities of public employers. To date the District has not received funding under the program but believes the reduction in rates resulting from these contributions is a key strategy and in the best financial interest of the District over the long run.

Consolidation of Buildings

The District’s fiscal year 2020-21 budget defers consolidation of the District’s facilities. If opportunities present which might be explored, discussion will be raised with the Facilities Subcommittee and the Board of Directors.

Capital Planning

The fiscal year 2020-21 budget accomplishes the first year of a long-term capital plan for each of the water, wastewater, and watershed protection utilities. We anticipate the completion of the water master plan near the end of June 2020 and have provided for the anticipated level of capital necessary to meet that plan’s requirements. The District will begin work on the Sanitary Master Plan in the 2020-2021 fiscal year. That work will update capital plans in the wastewater collections system and plant for the following fiscal years. The fiscal year 2020-21 budget includes some funding for capital projects related to the wastewater collections system and plant, pending completion of master planning, and for watershed protection infrastructure. Details of these projects can be found in the Capital Improvement Plan section of this budget document.

Capital expenditures are made from the capital funds. Resources to the capital funds are in the form of transfers from the respective operating funds (i.e. Drinking Water Fund to Water Capital Fund). Transfers are in turn funded through rates. As we look forward in the capital plans of the District, there may be opportunities to employ other financing strategies in the form of debt financing or partnerships with other governmental entities to accomplish specific capital projects.

Rate Impacts

Each of the items discussed above and typical inflationary increases lead us to propose rate increases in two of the three utilities. The management team has been meeting over the last several weeks to submit to the Budget Committee a complete, fiscally prudent, and accurate Budget. As mentioned previously, this budget reflects priorities in accordance with the goals of the Board of Directors.

Stable, predictable rates are preferred by customers and promote the growth of the local economy. The fiscal year 2020-21 budget incorporates anticipated rate increases in two of the three operating funds:

- Drinking Water with a 4.5% increase, an average of \$2.50 per two-month billing cycle; and
- Wastewater with a 4.5% increase, an average of \$4.82 per two-month billing cycle.

The average estimated two-month bill will increase a total of \$7.32 to \$189.02 from the current \$181.70.

Budget Assumptions

The 2020-20210 adopted budget incorporates the following assumptions:

Revenue Assumptions

- Increase in rates for Water and Wastewater utilities.
 - Drinking water rates assume a 1% drop in consumption as a result of increased conservation messaging, anticipated effects of the COVID-19 pandemic, and current trends in customer usage.
- Non-payment of bills by customers at 2% (based on history).

Expenditure Assumptions

- 2% inflationary increase in materials and services.
- Medical and Dental estimated increased rates of 15%.
- PERS employer contribution rate for fiscal 2020-21 consistent – second year of biennial rates.
- Step increases for eligible employees.
- No cost of living (COLA) adjustment.

Overall Strategies for the 2020-2021 Budget and Beyond

- Continue to manage rates in the context of stable operations and planned infrastructure maintenance and replacement.
- Continue to maintain prudent fund balances and reserves.
- Complete master plan for wastewater utility.
- Complete comprehensive rate study covering all three utilities.

Acknowledgements

This budget was developed by the District's Leadership Team with assistance from District staff. The members of the Leadership Team come from various backgrounds and perspectives to represent the interests of the District. I want to acknowledge their hard-work, efforts, and engagement and extend the District's appreciation.

Like other local governments, the District will need to be nimble, able to respond to changes resulting from the pandemic for our customers or changing requirements from State or Federal regulators. Oak Lodge Water Services needs to be able to consistently deliver our services - services that are key to our customers' health, every day without any interruption. Our customers depend upon us.

Respectfully submitted,

Sarah Jo Chaplen
General Manager and Budget Officer

Summary Budget Highlights

The fiscal year 2020-21 budget for the District totals \$41 million (total resources and total uses) and can be summarized as follows: \$5.2 million for Administrative Services, \$6.2 million for Drinking Water, \$10.6 million for Wastewater, \$2.0 million for Watershed Protection, \$4.8 million for Debt Service, and \$12.2 million in capital.

Resources

Service charges revenue is the primary resource to each of the operating funds. Service charges combine with interest income, system development charges (SDC) other miscellaneous revenues, and beginning fund balance in each of the funds to comprise total resources. Revenue from service charges across the operating funds (Drinking Water Fund, Wastewater Reclamation Fund and Watershed Protection Fund) is illustrated in the chart below:

Resources within each fund support the operations and capital requirements associated with each utility's respective functions. Personnel services and materials and services are accounted for within each operating fund. Support services, debt requirements, and capital costs are budgeted and recorded in separate funds to which each operating fund makes transfers.

Fees are set in June each year with a July 1 effective date. Fees are set based on estimated requirements for each fund as a whole and in consideration of future operations and capital plans as projected.

The fiscal year 2020-21 budget anticipates a nominal rate increase in the Drinking Water and Wastewater Reclamation Funds of 4.5%. There is no anticipated increase in the budget for the Watershed Protection rates. The resulting increase in the average, residential bimonthly bill is estimated at \$7.32, an overall increase of 4% when compared to fiscal year 2019-20.

Uses

Operating expenditures are budgeted by division within the Administrative Services Fund, and by category within each of the other funds. Personnel services and capital make up the majority of budgeted expenditures of the District for fiscal year 2020-21. Personnel services comprise 15.9% of the District's budgeted expenditures (excluding transfers) and capital spending makes up another 14.1%. The remaining budgeted requirements of the District include materials and services (17%), debt service (12.8%), special payments to PERS (3%), and contingencies and reserves (37.2%).

The chart below illustrates total expenditures (excluding transfers) by fund. Transfers among funds are excluded so as not to distort actual expenditures to parties outside of the District.

Personnel Services

The District budget includes 37 full-time regular (FTE) positions consistent with the prior year. There are no new positions put forward in the fiscal year 2020-21 budget. Benefit costs reflect increases in health insurance and quoted rates from providers. Employee insurance rates, which includes medical, dental, life, short-term disability, and long-term disability reflect a 15% increase.

PERS contributions are the other largest component of employee benefit costs and rates remain at the same level as fiscal year 2019-20. Fiscal year 2020-21 is the second year of the biennial rates established by PERS, set at 23.22% for Tier 1 and 2 members, and 17.65% for OPSRP members. The District contributed \$300,000 to PERS to establish a side account during fiscal year 2019-20 and has budgeted an additional \$900,000 in fiscal year 2020-21 to mitigate anticipated future rate increases.

Materials and Services

This category represents operational expenditures for goods and services supporting the District. Legal, audit and accounting, and other contractual services are budgeted within this category, as are utilities, repairs and maintenance, and supplies. The increases budgeted for fiscal year 2020-21 result primarily from stepping up maintenance efforts related to the water and wastewater systems and anticipated inflationary increases in goods and services costs from vendors.

Capital Expenditures

A consistent and thoughtful approach to asset management, major maintenance, and replacement allows the District to proactively plan and project significant cost items, and plan resources to avoid volatile rate impacts to our customers. Maintenance of capital reserves is one component of the District's strategies for funding capital needs; the others being rates and debt financing. Separate capital funds have been established to account for capital expenditures and ensure funding for future needs. Transfers from the operating fund provides resources to the capital funds and is complemented by interest earnings.

The fiscal year 2020-21 budget provides for capital spending in the Drinking Water Capital Fund of \$1.6 million, the Wastewater Reclamation Capital Fund of \$2.3 million, and the Watershed Protection Capital Fund of \$465 thousand. Each of the capital funds budgets for contingency to allow for flexibility in management of planned projects, funding for future year capital plans, and consideration for future replacement of equipment and vehicles.

Administrative Services Fund Fund 05

Purpose: The Administrative Services Fund centralizes the accounting and reporting for support services within the District – General Administration and Finance, Human Resources, Technical Services, and Vehicle Maintenance. Each of these support services are funded through transfers from the District’s operating funds on a predetermined basis of allocation.

Goals: The goal of the Administrative Services Fund is to provide an efficient and fair means to capture and allocate support services costs

Full Time Employees (FTE): 14

Major Funding Source(s): Operating transfers from the Drinking Water, Wastewater Reclamation, and Watershed Protection Funds.

The following provides a brief description of support services accounted for in the Administrative Services Fund.

Administration & Finance – Division 01

The Administration & Finance Division accounts for activities related to the District’s general administration, finance and management. There are six (6) full time employees within the Division comprised of the General Manager, Finance Director, Sr. Accountant, Jr. Accounting Specialist, Administrative Specialist I, and Administrative Specialist II.

Under the direct control of the District General Manager, this Division accounts for legal, audit, and other professional relationships and costs of the District. Office supplies and other central services costs related to administration of the District are budgeted in Division 01 as well – including janitorial, building maintenance, and utilities.

Under the direction of the Finance Director, activities and functions related to accounting, budgeting and financial reporting are accounted for in Division 01. Activities supporting the District’s general ledger accounting, accounts payable and receivable, and utility billing and collections are all budgeted within the Administration & Finance Division.

Human Resources – Division 02

The Human Resources Division consists of two full-time employees, the Human Resources (HR) and Payroll Manager and the District Recorder. The HR and Payroll Manager is responsible for the oversight of personnel management, District payroll, recruitment and hiring, staff training, on-boarding, employment law and labor contract compliance as well as the District’s insurance, including employee benefits, property, casualty, and worker’s compensation.

The District Recorder is responsible for managing the District’s records, public meetings, notices, Board packets, and minutes and serves as an executive assistant to both the General Manager and the HR and Payroll Manager. In managing the District’s records, the District Recorder ensures the District meets retention and destruction requirements for all records.

Board expense has been moved to the Division 2 budget with the fiscal year 2020-21 budget cycle to coincide with the District Recorder’s duties. The total of the District’s property, casualty and cyber security insurance are budgeted in this Division to reflect the HR Manager’s oversight

insurance and claims. Finally, all telephone and cell services are budgeted in Division 02 with oversight by the HR and Payroll Manager.

Technical Services – Division 03

The Technical Services Division is home to seven (7) full-time employees: the District Engineer, Water Services Engineer, Technical Services Coordinator, Development Review Specialist, Outreach and Program Specialist, and two Pollution Prevention Specialists. Together, these positions provide direct support to the operating funds with respect to State issued permits, development review and permit issuance; project inspections; engineering; capital project management, information technology for the District, education, and outreach.

The District’s information technology costs including hardware, software, and support services are budgeted within Division 03. Communications and outreach costs of the District are also budgeted within Technical Services.

Vehicle Maintenance – Division 04

The Vehicle Maintenance Division budgets and accounts for all maintenance and fuel costs related to the District’s vehicles. The Division has no directly assigned FTE.

Drinking Water Fund Fund 10

Purpose: The purpose of the Drinking Water Fund is to manage and direct operations related to distribution of potable drinking water to the District's residents and customers.

The District maintains and operates a water transmission and distribution system to deliver water purchased directly from the North Clackamas County Water Commission (NCCWC). NCCWC takes water from the Clackamas River, treats it, and wholesales to customers including the District. The District is also part owner of the treatment plant operated by the NCCWC.

Goals: The following details the goals of the Drinking Water Fund:

- Educate residents, developers, contractors, businesses, industries, and youth about watershed protection.
- Efficiently meet the drinking water collection, transmission, and distribution needs of the community through uninterrupted service delivery.
- Provide fire protection.
- Protect community health.
- Provide safe drinking water to the community.

Full Time Employees (FTE): 7.5

Major Funding Source(s): Water service charges billed to District customers.

The Drinking Water Fund budgets and accounts for the cost of purchased water and all associated costs of delivering safe drinking water to District customers including system maintenance, and a share of the support costs attributable to the water operations via transfers to the Administrative Services Fund. The Drinking Water Fund also makes transfers to a capital fund for capital projects related to the distribution system.

The Field Superintendent splits his time between water distribution and wastewater collections activities, and directly supervises a water field supervisor and six (6) water field utility workers within the Drinking Water Fund.

*** Drinking water capital expenditures are budgeted in Fund 71 beginning with Fiscal Year 18-19.

Wastewater Reclamation Fund Fund 20

Purpose: The purpose of the Drinking Water Fund is to manage operating and capital requirements related to activities of the wastewater reclamation program.

Wastewater reclamation activities comprise managing a wastewater collection system totaling 100 miles in length, five strategically located wastewater pumping stations, and a facility that reclaims an average of 4 million gallons of wastewater per day. In a given fiscal year the District collects, treats, and reclaims more than 1.4 billion gallons of wastewater.

The District holds a National Pollutant Discharge Elimination System (NPDES) Permit issued by the State of Oregon Department of Environmental Quality (DEQ) that allows the District to be responsible for the management of the wastewater reclamation program in its service area. The NPDES Permit establishes mandatory water quality standards for the discharge of reclaimed water into the watershed. The main outfall point is located at the reclamation facility and discharge goes directly into the Willamette River.

Goals: The following details the goals of the Wastewater Reclamation Fund:

- Educate residents, developers, contractors, businesses, industries, and youth about watershed protection.
- Efficiently meet the wastewater collection, transmission, and reclamation needs of the community through uninterrupted service delivery.
- Provide environmental protection for the Willamette River.
- Protect community health.

Full Time Employees (FTE): 13.5; 9 FTE in Wastewater Treatment (Division 21) and 4.5 FTE in Wastewater Collections (Division 22)

Major Funding Source(s): Wastewater service charges billed to District customers.

The Wastewater Reclamation Fund is divided between two divisions: treatment and collections. The Collections Division is charged with maintenance of the system that brings wastewater to the plant. The Treatment Division budgets and accounts for direct costs of treatment including chemicals, electricity, hauling of spoils, and other costs. The Fund also pays a share of support services costs to the Administrative Services Fund via operating transfers based on an analysis of relative support received. The Fund also makes transfers to support capital projects and to cover debt service requirements related to the improvements and expansion at the treatment plant.

Staffing within the Wastewater Reclamation Fund is divided functionally between collection and treatment responsibilities. The collections team is comprised of one-half of the Field Superintendent position and four (4) sewer field utility workers. The Plant Superintendent directly oversees the treatment operations and directs the five (5) plant operators, two (2) mechanics, and the asset resource specialist position.

Watershed Protection Fund Fund 30

Purpose: The purpose of the Watershed Protection Fund is to manage operating and capital requirements related to activities of the watershed protection program.

Watershed protection activities comprise managing a surface water management collection system totaling 84 miles in length. The District is a joint holder of a National Pollutant Discharge Elimination System (NPDES) Municipal Separate Storm Sewer System (MS4) Permit issued by the State of Oregon Department of Environmental Quality (DEQ) that allows the District to be jointly responsible for the management of watershed protection activities in its service area. The NPDES Permit establishes mandatory water quality standards for the discharge of un-reclaimed water into watersheds. Watersheds within the District service area include Boardman Creek and River Forest Creek; but discharge also occurs into Kellogg Creek and Rinearson Creek. All watersheds, or portions of watersheds, ultimately discharge to the Willamette River.

Goals: The following details the goals of the Wastewater Reclamation Fund:

- Educate residents, developers, contractors, businesses, industries, and youth about watershed protection.
- Protect local watersheds through planning, permits, and regulations.
- Minimize, or eliminate pollutants that may impair the proper functioning ecological condition of the area's rivers, lakes, and streams.
- Operate, maintain, control, and regulate the negative impacts of surface water and storm water runoff to protect the community's health and safety.
- Where feasible, mitigate storm water impacts on public and private property during normal conditions.

Full Time Employees (FTE): 2

Major Funding Source(s): Watershed protection surcharges billed to District customers.

The primary costs budgeted and accounted for in the Watershed Protection Fund relate to system maintenance and communications and outreach related to surface water management and programs. Transfers are made to fund capital projects as well as to the Administrative Services Fund to cover support services provided.

There are two (2) full-time pollution prevention specialist positions budgeted within the Watershed Protection Fund. Organizationally, these positions report to the District Engineer.

**Wastewater General Obligation Debt Service Fund
Fund 40**

Purpose: To account for principal and interest payments related to the District’s debt associated with the wastewater treatment plant.

General Obligation Bonds

On May 13, 2010, the District issued \$24,000,000 in General Obligations (GO) Bonds. The bonds were on a twenty-year term to maturity with coupon rates ranging from 2% to 4%. On December 20, 2017, the District defeased \$14,310,000 of the callable portion which had a 4% coupon; and replaced them with a bank loan that has an interest rate of 2.5% to save approximately \$915K in total debt service through fiscal year 2030. The remaining portion of the original 4% bonds will be retired in fiscal year 2020-21.

State of Oregon Infrastructure Financing Authority Loans

On August 31, 2010, the State of Oregon Infrastructure Finance Authority (IFA) loaned the District \$8,000,000 which originated from the State’s issuance of Recovery Zone Economic Development Bonds. These are also known as United States Build America Bonds. The bonds will be repaid over a twenty-year term to maturity and the range of interest rates associated with the bond series is 2% to 2.84%. Of the amount borrowed 87% of the debt qualifies for a 45% interest subsidy from the United States Treasury. The net interest cost of the bond series to maturity is 2.71%.

Major Funding Source(s): Operating transfers from the Wastewater Reclamation Fund.

This fund budgets for scheduled principal and interest payments on the above-described debt.

Wastewater Revenue Bond Debt Service Fund Fund 50

Purpose: To account for principal and interest payments related to the District's non-property tax backed debt.

State of Oregon Department of Environmental Quality Clean Water State Revolving Fund Loan

In fiscal year 2011, the District received \$19,000,000 in loans from the State of Oregon Department of Environmental Quality Clean Water State Revolving Fund (SRF) Loan Program for Intended-Use Plans. Of the amount borrowed, \$12,573,566 or 66% of the funds comprised federal capitalization grant funds, whereas the remaining \$6,426,434 or 34% of the funds comprised state funds. The loans will be repaid over a twenty-year term to maturity and the range of interest rates associated with the loan series is 0% to 2.65% plus an annual administrative fee of 0.50% of the principal balance. The total net interest cost of the entire loan series to maturity, including the administrative fee, is 2.45%. The loans have a legal loan reserve requirement in which the District must place in reserve an amount equal to one-half the average annual debt service; as a result, the District has established a legal reserve amount of \$590,483 to satisfy legal loan reserve requirements. The program also has debt service coverage requirements in which the District must maintain wastewater rates in connection with the operation of the facility that are adequate to generate net operating revenues in each fiscal year sufficient to pay all revenue backed debt service requirements plus 5% of the loan's annual debt service expenditures.

JP Morgan Bank Loan

On December 20, 2017, the District borrowed \$15,173,000 from JP Morgan Bank in order to defease \$14,310,000 in General Obligation Bonds that were callable and had a 4% coupon rate. The loan will be repaid over a thirteen-year term to maturity and the interest rate is 2.50%. The advance refunding will save the District approximately \$915K in total debt service through fiscal year 2030. The loan does not have a legal loan reserve requirement but it does have a debt service coverage requirement in which the District must charge rates and fees adequate to generate coverage revenues that are at least equal to 20% of parity bond debt service and 100% of combined parity and subordinate obligation debt service.

Major Funding Source(s): Operating transfers from the Wastewater Reclamation Fund.

This fund budgets and accounts for scheduled principal and interest payments on the above-described debt.

**Drinking Water Capital Fund
Fund 71**

Purpose: To account for debt proceeds, capital expenditures, contingencies and reserves associated with the District's capital improvement planning as relates to drinking water.

The District's water distribution system is primarily comprised of 6" and 8" cast and ductile iron pipe. The District has concentrated on eliminating sections of 2' pipe and looping dead-ends wherever practical.

The District has more than enough water storage to supply the system; water storage includes two 5 million-gallon reservoirs at the Valley View site and two 2.8 million-gallon reservoirs at the View Acres site. The Valley View Reservoirs are also used as the storage source to serve the Sunrise Water Authority.

Soon the District will adopt a Master Plan which will influence rates charged for water base and consumption charges and system development charges (SDC). The District now has an up-to-date hydraulic model to help staff identify and focus efforts within the capital improvement program (CIP).

Oak Lodge Water Services District owns the North Clackamas County Water Commission treatment plant in partnership with Sunrise Water Authority and the City of Gladstone which provides the daily water needs for the District.

Major Funding Source(s): Operating transfers from the Drinking Water Fund.

Refer to the Capital Improvement Plan for detailed information on planned capital projects.

**Wastewater Reclamation Capital Fund
Fund 72**

Purpose: To account for debt proceeds, capital expenditures, contingencies and reserves associated with the District's capital improvement planning as relates to wastewater reclamation.

The District charges customers a monthly fee for sanitary sewer service that covers both base and consumption-related costs. Amounts are transferred to the Wastewater Capital Fund based on identified capital needs per the CIP and any current master planning.

This budget as proposed allows the District to wrap up treatment plant modifications to create redundancies and improve our solids process efficiency. A sanitary sewer master plan has also been proposed to help staff identify where to invest the next 30 years of capital expenses.

Major Funding Source(s): Operating transfers from the Wastewater Reclamation Fund. For more detailed information about each proposed project, please refer to the Capital Improvement Plan for detailed information on planned capital projects.

**Watershed Protection Capital Fund
Fund 73**

Purpose: To account for debt proceeds, capital expenditures, contingencies and reserves associated with the District’s capital improvement planning as relates to watershed protection.

The Oak Lodge Water Services District is responsible for water quality improvement projects within the communities of Oak Grove and Jennings Lodge. Although not formal cities, this portion of unincorporated Clackamas County is heavily urbanized with residential, commercial, and industrial development. Less than 5 years ago, an analysis of the District revealed that the total impervious area for the District is 80% -- that’s about 2800 acres of surface that does not infiltrate water, all of which contributes to increased water velocity and scour in local streams, and the majority of which contributes pollutants into the surface water system, including streams and rivers.

Major Funding Source(s): Operating transfers from the Watershed Protection Fund. For more detailed information about each proposed project, please refer to the Capital Improvement Plan for detailed information on planned capital projects.

Message from the Technical Services Manager

Resource management is such an important function for any service provider and Oak Lodge Water Services District (OLWSD) is no different in this regard. Finding a balance between exemplary customer service and the cost to provide that service is key to the success of public organizations. In order to achieve this balance, one tool we use is a Capital Improvement Plan (CIP) because our service is heavily dependent upon physical infrastructure such as pipes. This document monetarily prepares for the expansion and maintenance of your Wastewater and Water systems as well as the provision of Watershed Protection services.

As fiscal year 2020 draws to a close, the District finds itself in a new era. With the modernization of the Water Reclamation Facility achieved, video inspection of the sanitary mainline collection system completed and completion of a majority of the existing Water Master Plan projects, we must now assess and plan where resources will soon need to be allocated. The next logical step will be to update all of the District's Master Plans. With up-to-date inspections of the collection and distribution systems, this information will feed into models that can help Staff predict failures before they occur. Then by strategically maintaining and/or replacing our systems, we become proactive rather than reactive. This proactive approach will not only save our rate payers money, but will enhance services due to time savings. On a house waiting for a roof failure creates more damage to the house and costs more to repair, the same holds true for the District's investment in your infrastructure.

Looking forward, the next few fiscal years will likely bring the District new permits from the Oregon Department of Environmental Quality (DEQ). An updated National Pollutant Discharge Elimination System (NPDES) permit for the Water Reclamation Facility will mean renewed land application of biosolids and an updated MS4 permit may bring with it new standards for water quality and/or requirements for environmental studies. While these permits generally bring added costs, they also improve the quality of our natural resources and in-turn improve our community's quality of life.

We at the District, hope that this document provides clear, concise and transparent information to you as our rate payer. As a result of reading this document, we hope you gain a better understanding of how the investment of revenue from your rates ensure your Water, Wastewater and surface water systems remain functioning well into the future. If you have any questions about this document, I encourage you to contact me at (503) 353-4202 or jason@olwsd.org.

Sincerely,

Jason Rice, PE

How to Use This Document

This six-year Capital Improvement Plan document provides detailed descriptions about projects organized by fund. Each fund section begins with a summary overview of the function of the fund followed by funding and project information. Summary tables and graphs highlight the capital projects within each fund. Following the summary section are detailed breakdowns of each project, along with project schedules, cost estimates, and operating budget impacts.

Summary information of all capital projects sorted by fund, and funding source are included as appendices to this document.

The project title and description explains the details and need for each project.

Aeration Basin Baffle Wall

The Aeration Basin Baffle Wall Project would conserve electricity and reduce greenhouse gas emissions by enabling plant operators to switch off parts of the aeration basin. The District has normally run all four of its Aeration Basin trains. Hydraulic modeling as part of an Aeration Study in FY 2019 shows that only two trains are needed for this task if the first train is divide it in two by a baffle wall. This project would install that barrier.

Funding Source	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	Total
Wastewater Capital Fund	150,000						150,000

Operating Budget Impact

This project will reduce on-going maintenance and cause for b... permit compliance.

The outcome of the project on the operating budget of each fund is described in this area.

This section indicates whether the project is funded or unfunded, the funding source, and the cost for each scheduled project year.

Capital Improvement Plan Overview

The six-year Capital Improvement Plan (CIP) establishes guidance and planning for the District's investments in capital infrastructure. At the foundation of the CIP are the District's Surface Water, Wastewater and Water Master Plan documents. These master plans illustrate the long-term needs and goals of each department as defined by community input, advisory groups, expert consultants, and District Staff., and District Board goals, operational (i.e. service delivery) needs, and regulatory requirements further refine and shape the CIP.

Projects within the CIP are prioritized and matched with projections of future revenues. Inclusion of a project within this document does not necessarily reflect a budgeted spending commitment, but is the anticipated priority at this snapshot in time based on estimated future revenues. Current revenues are not enough to keep up with all the capital needs of the District. Additionally, there are restrictions on many revenue sources in relation to where the funds may be spent.

As compared to Capital Outlay line in the Budget, which may include purchases as low as \$2,500 and have a useful life of at least one year. A capital "project" contained within this document is defined by complexity of the work.

The CIP is intended as a method of communication with citizens, businesses, advisory groups, and the Board of Directors. It gives the public the opportunity to see the District's proposed plans for the future and provide feedback to the Board and Staff.

The goal of this Capital Improvement Plan is to provide the maximum sustainable level of priority capital investments to deliver outcomes that are of the highest importance to our citizens and provide for a healthy, safe, active, efficient, and optimized community with excellent livability

Factors in Evaluating CIP Projects

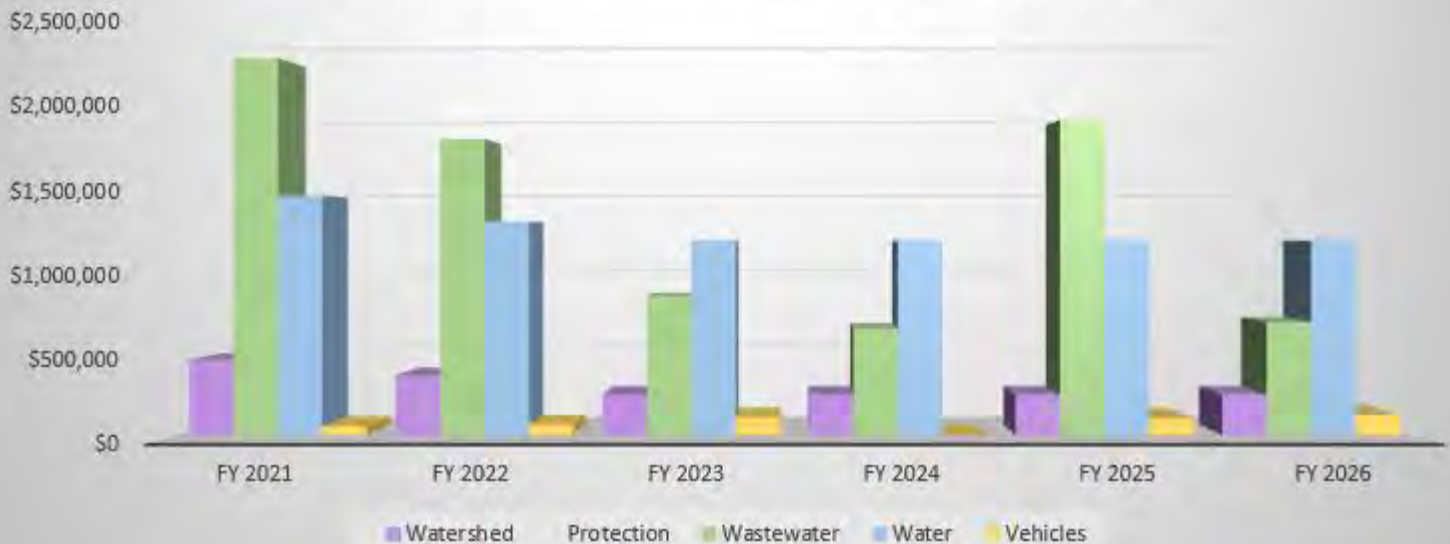

- Master planning documents
- Board goals
- Operational needs
- Regulatory requirements
- Fiscal Impacts
- Health, safety, and environmental effects
- Community economic effects
- Feasibility, including public support and disruption
- Implications of deferring the project
- Coordination and advantages of joint projects

Summary Information

Funding Summary

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	Total
Watershed Protection	\$465,000	\$370,000	\$250,000	\$250,000	\$250,000	\$250,000	\$1,835,000
Wastewater	\$2,330,000	\$1,830,000	\$860,000	\$660,000	\$1,950,000	\$700,000	\$8,330,000
Water	\$1,480,000	\$1,320,000	\$1,200,000	\$1,200,000	\$1,200,000	\$1,200,000	\$7,600,000
Vehicles	\$55,000	\$67,000	\$110,000	\$0	\$105,000	\$127,000	\$464,000
Total Capital Improvement Program	\$4,330,000	\$3,587,000	\$2,420,000	\$2,110,000	\$3,505,000	\$2,277,000	\$18,229,000

Capital Improvement Program Spending

Funding for capital projects comes from four distinct sources

- (1) Utility User Fees
- (2) Bonds
- (3) Grants come from outside agencies such as ODOT, Metro, DEQ, Oregon Parks, and the Oregon Marine Board
- (4) Systems Development Charges (SDCs): from new development

Multi-Document Transparency

The District recognizes that the projects included in the Six-Year Capital Improvement Plan represent a significant amount of public monies and it is the District's intention is to present this information across several documents to ensure that projects are clearly understood and accounted for in financial forecasts, budgets, capital improvement plans and master plans.

Multi-document transparency means that a capital project necessitated by a master plan will be included in the CIP document and then planned for in the forecast document. Funding for the project will then be included in the budget document and the expense will be recorded in quarterly and annual financial reports.

Financial Reporting

“Capital Outlay” is reported in financial forecasts, budgets, quarterly reports, and annual reports. This line item corresponds with the annual funded totals shown in this Six-Year Capital Improvement Plan (CIP).

The adoption of this CIP document provides the baseline for the capital outlay that will be included in future budget documents for the Budget Committee to review, consider and approve, and for the Board to formally adopt.

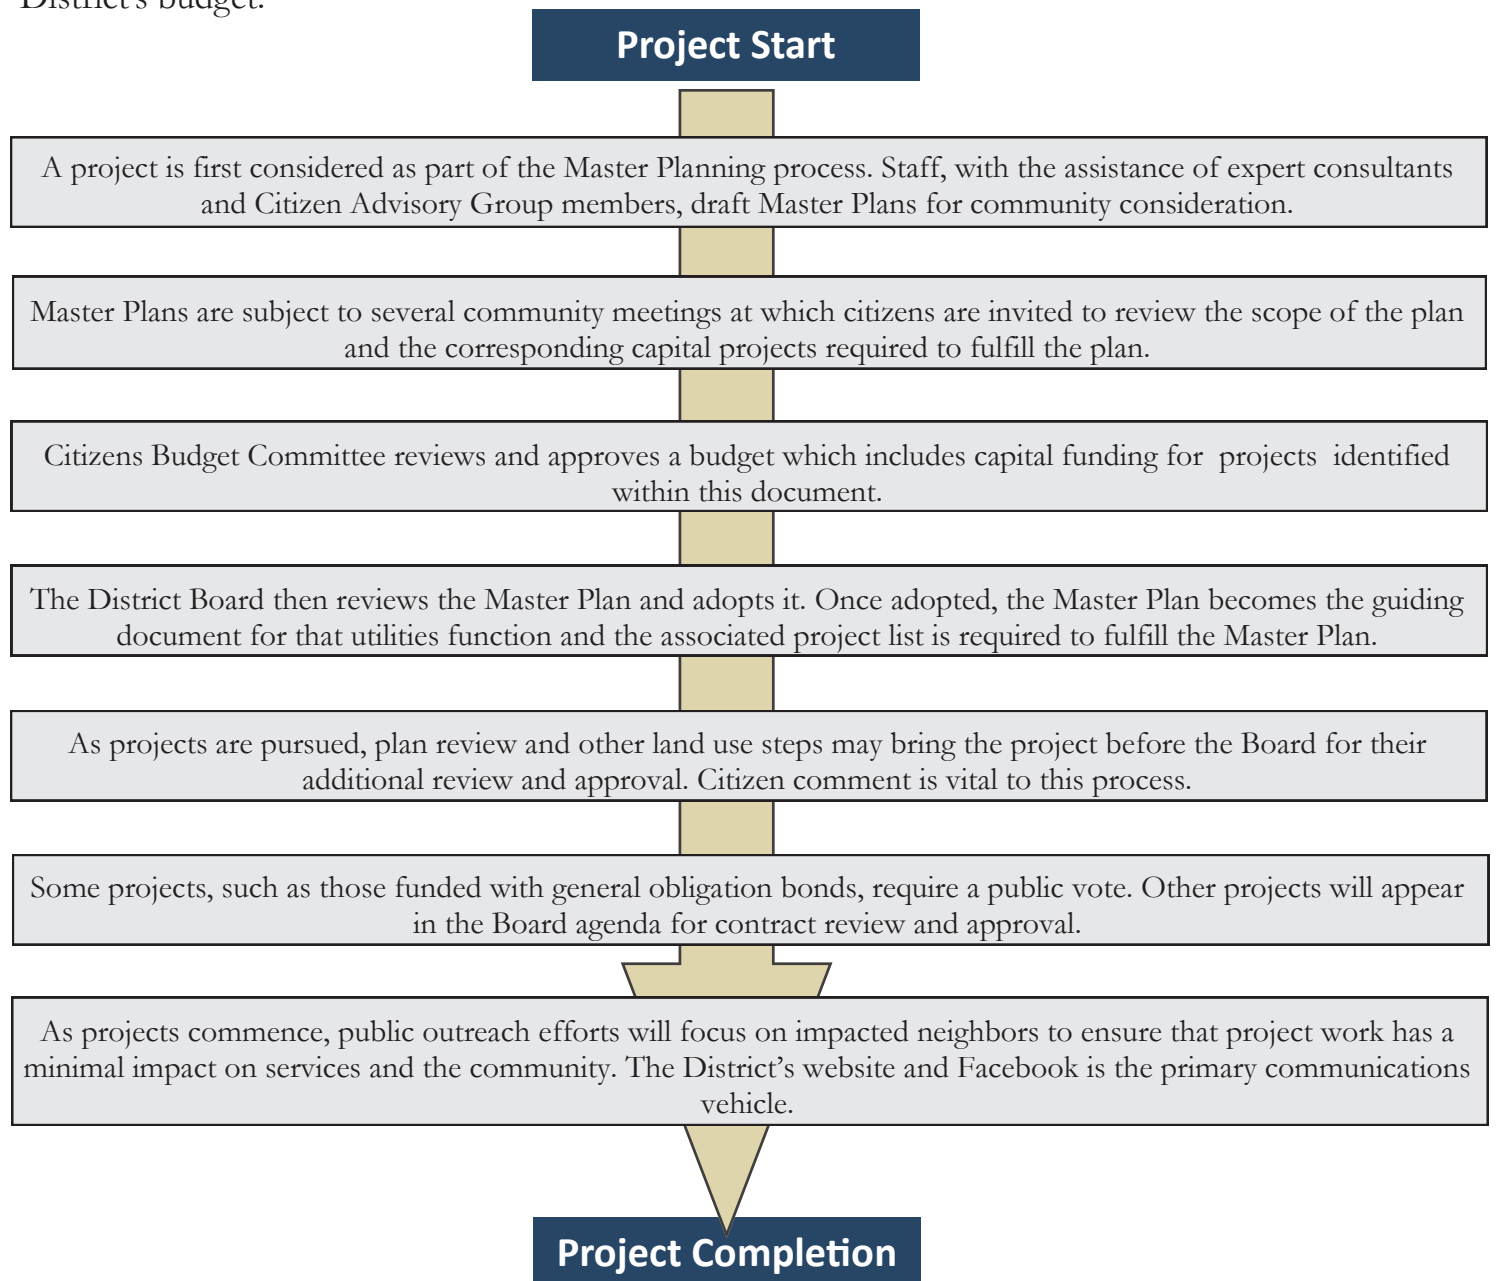

The Process of a CIP Project

Question:

How does a project get placed on the Capital Improvement Plan?

Answer:

Rate Payer involvement is the cornerstone of the Six-Year Capital Improvement Plan. Projects are vetted through a multi-step process (see below) that includes public comment at several stages to ensure that projects meet the community's needs, in addition to expert analyses during plan development. Funding is not available for projects to begin until it is approved and adopted into the District's budget.

Watershed Protection

Overview

The Oak Lodge Water Services District is responsible for water quality improvement projects within the communities of Oak Grove and Jennings Lodge, Oregon. Although not formal cities, this portion of unincorporated Clackamas County is heavily urbanized with residential, commercial, and industrial development. Less than 10 years ago, an analysis of the District revealed that the Total Impervious Area for OLWSD's is 80% -- that's about 2800 acres of surface that does not infiltrate water, all of which contributes to increased water velocity and scour in local streams, and the majority of which contributes pollutants into the surface water system, including streams and rivers.

Oak Lodge Water Services District charges customers a monthly surface water fee, which covers all surface water program operations. Annual revenue changes slightly (based on the number of customers), but is approximately \$1.5M annually.

Projects within the Surface Water Capital Improvement Program include new regional stormwater treatment facilities, retrofits of existing facilities, installation of roadside facilities, such as "rain gardens", upgrades of existing storm lines and catch basins, and natural resource restoration projects.

This year, a Stormwater Master Plan is being recommended for funding. The purpose of this document is to create a comprehensive plan that accounts for the replacement of existing infrastructure as well as predict through computer modelling where additional infrastructure should be built to account for growth.

Watershed Protection Capital Improvement Projects

Page	Project Name	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	Totals
12	Stormwater Master Plan	215,000						\$ 215,000
12	Localized Enhancement Program	250,000	250,000	250,000	250,000	250,000	250,000	\$ 1,500,000
13	Decant Facility		120,000					\$ 120,000
	Total Watershed Protection Capital Expenses	\$ 465,000	\$ 370,000	\$ 250,000	\$ 250,000	\$ 250,000	\$ 250,000	\$ 1,835,000

Watershed Protection

Stormwater Master Plan

This project will accomplish two goals of the District. The first, will be to identify the desires of our public as it relates to the level of services this District provides through its Watershed Protection rate. This will be done through multiple public meetings and a strong outreach process.

Once the data is collected and shared with the Board, this project will create a Master Plan for Stormwater that meets those expectations and helps set future rates to do so.

<u>Funding Source</u>	<u>FY 2020</u>	<u>FY 2021</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>Total</u>
Surface Water Capital Fund	22,000	215,000					237,000

Operating Budget Impact

This project has the potential to identify costs that may directly impact rates (with Board Approval).

Localized Enhancement Program

This program aims to fix small to medium scale localized issues throughout the District. Projects will include replacement of damaged stormwater pipes owned by the District, create new roadside surface water treatment and address issues brought forth by District customers.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Surface Water Capital Fund	250,000	250,000	250,000	250,000	250,000	250,000	1,500,000

Operating Budget Impact

These projects have the potential to both decrease Staff's time reporting to localized flooding and increase maintenance of District owned facilities.

Capital Projects

WRF Decant Expansion

Decant facilities are used to remove water from excavated material so that hauling and disposal costs can be minimized.

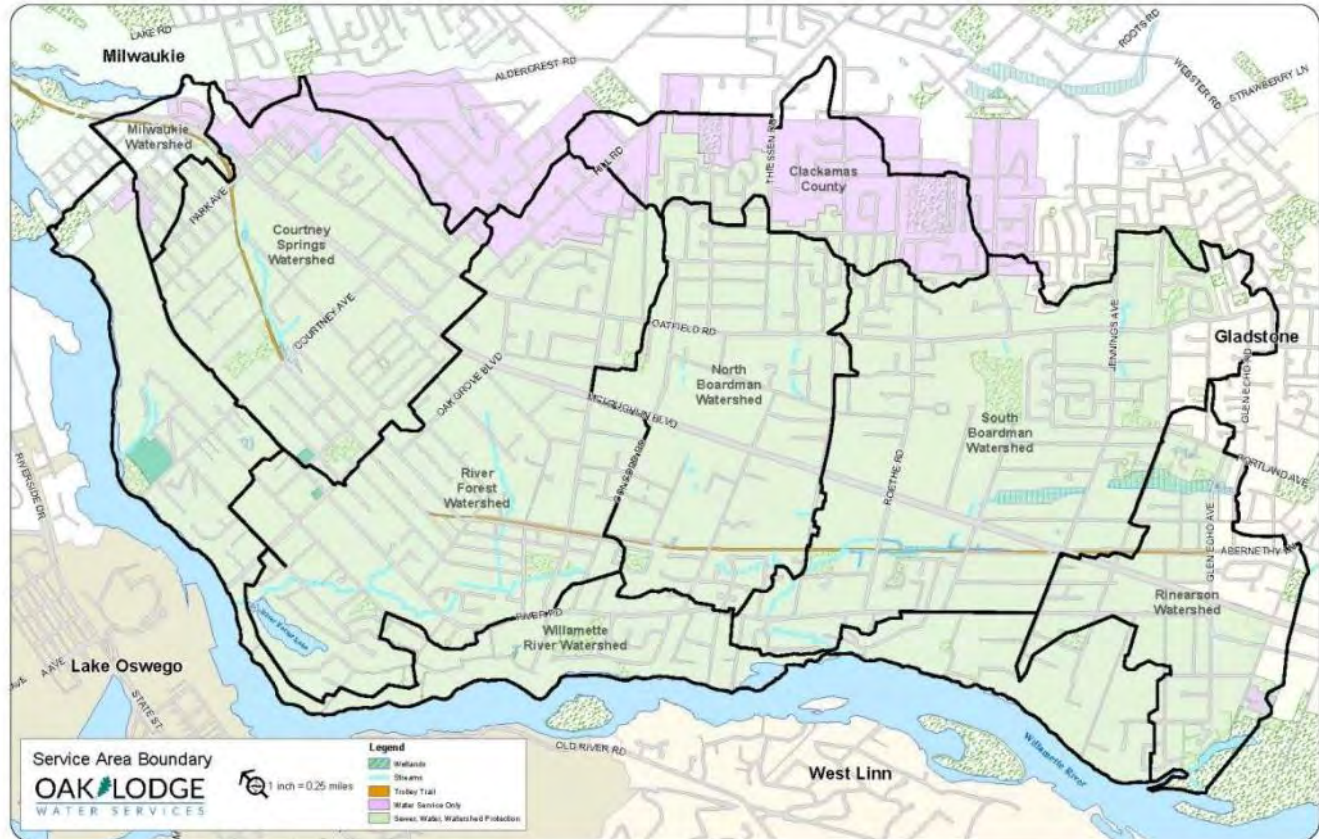

The goal of this project is to provide enough capacity for all three utilities to utilize after removing the decant facility at the Administrative Office (14496 SE River Road).

The payment for this project will be split evenly across all three utilities.

Funding Source	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	Total
Surface Water Capital Fund	10,000			120,000			130,000

Operating Budget Impact

Completion of this project will allow for draining of water from wet soils, thus reducing hauling and disposal costs of soils. It will also allow for temporary storage when hauling isn't available, thus enabling staff to continue working on projects with little delay.

Overview

Oak Lodge Water Services District charges customers a monthly fee for sanitary sewer service. Annual revenue changes slightly based on the number and types of customers, but comes in at approximately \$8.2M annually. Of this revenue, approximately 16% is budgeted to be used on capital improvements. The majority of sanitary sewer revenue is used for payment of the debt service to address the various loans associated with the Treatment Plant Expansion project.

Projects within the Sewer Capital Improvement list include finishing a conversion of the District's last anaerobic digester to meet permit requirements for land application of solids, projects to replace pipe deficiencies and trouble spots in the collection system and Water Reclamation Facility enhancements to the elements of the plant that were not reconstructed with the plant expansion project.

Capital Projects

Wastewater Capital Improvement Projects

Wastewater

Belt Filter Press #2 Retrofit

This project is intended to facilitate refurbishment and improvements of the 16 year old Solids Handling Facility. Project is expected to include improvements to the control systems, environmental controls (HVAC), and equipment refurbishments and piping replacement.

<u>Funding Source</u>	<u>FY 2018</u>	<u>FY 2019</u>	<u>FY 2020</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>Total</u>
Wastewater Capital Fund	85,000		115,000	340,000			540,000

Operating Budget Impact

None. Completion of this project is expected to maintain existing system performance and increase reliability.

Solids Piping Project

Creates a new and pipeline connection between the two Aerobic Digesters and the two Interchange Bioreactors (IBRs) that together process wasted sludge into biosolids. These tanks were not initially built to operate together, but a minor piping modifications since the construction of the IBRs has connected the four tanks sufficiently to avert an overload of solids in the plant. The Solids Piping Project turns that patch into a fix that brings with it a wide range of benefits.

<u>Funding Source</u>	<u>FY 2020</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>Total</u>
Wastewater Capital Fund	160,000	420,000					580,000

Operating Budget Impact

Reduces electricity and operator time needed to run the currently cumbersome sludge treatment process. Increases the plant's capacity to store wasted sludge. Makes the IBR's maintainable by allowing them to be drained. Enables tanks to operate in isolation and sludge to be thickened and wasted continuously. Adds corrosion protection by better controlling acidity and alkalinity.

POSITIVE SLOPE (CORRECT)

NO SLOPE

NEGATIVE SLOPE (LOW AREA)

Hillside Sewer Line— 2B Trunk Sag Adjustment

This project includes replacing 638 feet of 12-inch diameter pipe that has settled. This settlement causes sediment, grease and fats to accumulate in the line that causes field staff to maintain this line more often than it should be.

Funding Source	FY 2021	FY 2022	FY 2023	FY 2024	FY 20245	FY 2026	Total
Wastewater Capital Fund	400,000						400,000

Operating Budget Impact

Replacement of this section will reduce the operating budget due to less frequent maintenance on this section.

2A010-343 Line Replacement

This project replaces via pipe bursting 160 feet of 8-inch main that has deteriorated. This settlement causes sediment, grease and fats to accumulate in the line that causes field staff to maintain this line more often than it should be.

Funding Source	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	Total
Wastewater Capital Fund	60,000						60,000

Operating Budget Impact

Replacement of this section will reduce the operating budget due to less frequent maintenance on this section.

Sanitary Sewer Master Plan

The District’s current Sanitary Master Plan was partially written upon historical knowledge of Staff. By the time this project is let, Staff will have collected and logged condition ratings via TV inspections that will better enable an updated Master Plan to drive focus on replacing our aging infrastructure.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund	400,000						400,000

Operating Budget Impact

This project has the potential to identify costs that may directly impact rates (with Board Approval).

Aeration Basin Baffle Wall

The Aeration Basin Baffle Wall Project would conserve electricity and reduce greenhouse gas emissions by enabling plant operators to switch off parts of the aeration basin. The District has normally run all four of its Aeration Basin trains. Hydraulic modeling as part of an Aeration Study in FY 2019 shows that only two trains are needed for this task if the first train is divide it in two by a baffle wall. This project would install that barrier.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund	150,000						150,000

Operating Budget Impact

This project will reduce on-going maintenance and cause for better permit compliance.

WTP Blower Rehab

When the Water Reclamation Facility was built, the Interchange Bio-Reactors were designed with independent blowers. During a value engineering phase, one of the four Aeration Blowers was repurposed to supply air to the IBRs. Due to piping limitations, only that blower can be used for aerating the IBRs. Three years later, that blower catastrophically failed. Analysis of the failure indicated the potential for the blower not operating within its design parameters. One of the other Aeration Blowers was moved into that enclosure and the failed blower was replaced.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund	150,000						150,000

Operating Budget Impact

This is an optimization project focused on improving reliability improvements. Additional blowers will end up consuming more power

Lateral Repair Program

The focus of this program is to repair and replace the public portion (the portion in the in the right-of-way) of wastewater laterals. Priority will be given to laterals allowing stormwater inflow and infiltration through breaks and cause the greatest impacts to the operating budget.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund	60,000	60,000	60,000	60,000	100,000	100,000	440,000

Operating Budget Impact

This project will decrease operating expenditures by reducing the total amount of inflow and infiltration into the wastewater system.

Pump Station Rebuild Program

Oak Lodge Water Services has five sanitary sewer pumping stations that convey sewage from low lying areas to areas that can gravity flow to the WRF. Several of these pump stations are critical for meeting the District goal of collecting and treating 100% of our customers' used water. The three most critical stations in descending order are Pump Station #3 located at 2704 SE Park Ave., Pump Station #2, located at 1716 SE Oak Shore Lane, and Pump Station #5 located at 17560 SE Walta Vista Drive.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund	350,000	50,000	300,000	50,000	300,000	50,000	1,100,000

Operating Budget Impact

This project will reduce the amount of emergency repairs and as a result, emergency overflows.

Mainline Repair Program

Projects under this program generally consist of spot repairs where structural or inadequate flow conditions exist. Projects are identified based on routine system monitoring and/or maintenance done by the Field Crews and projects identified in a Sanitary Sewer Master Plan.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund		250,000		500,000	500,000	500,000	1,750,000

Operating Budget Impact

This project will decrease operating expenditures by reducing the total amount of inflow and infiltration into the wastewater system.

WRF Decant Expansion

Decant facilities are used to remove water from excavated material so that hauling and disposal costs can be minimized.

The goal of this project is to provide enough capacity for all three utilities to utilize after removing the decant facility at the Administrative Office (14496 SE River Road).

The payment for this project will be split evenly across all three utilities.

<u>Funding Source</u>	<u>FY 2019</u>	<u>FY 2020</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>Total</u>
Wastewater Capital Fund	10,000			120,000			130,000

Operating Budget Impact

Completion of this project will allow for draining of water from wet soils, thus reducing hauling and disposal costs of soils. It will also allow for temporary storage when hauling isn't available, thus enabling staff to continue working on projects with little delay.

Secondary Clarifiers 1 and 2 Refurbishment

Replaces the internal mechanisms of secondary clarifiers 1 and 2, which are reaching the end of their lifespan.

Completely demolishes ageing steel and fiberglass components, and drive mechanism. Replaces these with new stainless steel and aluminum components to protect against corrosion.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund		1,000,000					1,000,000

Operating Budget Impact

Reduces the risk of critical down time by replacing steel components deteriorating from rust. Provides long-term value by reinstalling mechanisms with corrosion-resistant materials. Enhances clarifier performance. Reduces need for mechanical repairs.

Wastewater

Ultra-Violet Channel Refurbishment

This project is intended to replace complex gate maneuvering and level control with a passive level control system, replace the effluent flow meters, replace the influent gates with simple actuated slide gates, and inspect and modernize the UV bulb control system itself.

The intent of the rebuild is to have a more reliable, redundant UV disinfection system which is vital to permit compliance.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund		300,000					300,000

Operating Budget Impact

This project will reduce on-going maintenance and cause for better permit compliance.

Aeration Basin Diffuser Replacement

“Diffusers” are what air is pushed through in order to aerate the sludge before entering the secondary clarifiers. They have a useful life of 8-10 years and are in need of replacement.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund		300,000					300,000

Operating Budget Impact

This project will reduce on-going maintenance and cause for better permit compliance.

Return Activated Sludge Monitor Control Center Replacement

This motor control center did not get replaced in the plant expansion. It controls the Return Activated Sludge pumps among other equipment in that building. The system is now out-of-date and code. In order to do lock out/tag out you have to open the panel doors and then you are exposed to a live system. The panel replacement would use standard breakers and new instrumentation which will shrink the foot print of the MCC. There will be electrical efficiencies gained with more up to date wiring and controls. The new panel would have to be installed and wired up in parallel before disconnecting the old panel.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund			500,000				500,000

Operating Budget Impact

This project will reduce the overall energy needs at the plant and will cause for monthly power bills to decrease.

Manhole Repair Program

This program was created to ensure the replacement of all manholes within the Wastewater network over a 150-year period. In the case of a manhole having satisfactory structural integrity, manhole rehabilitation (i.e., manhole lining or grouting) will be done in lieu of full manhole replacement. Manholes to be replaced or rehabilitated will be identified by staff on an annual basis.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund				50,000	50,000	50,000	Ongoing

Operating Budget Impact

This project will not increase operating expenditures. These projects will replace or repair manholes one-for-one and will not increase the number of wastewater assets system-wide.

Wastewater

Influent Pump Station Reconstruction

This project completely reconfigures the pump station wet well from a box with corners that trap debris and sediment to one with tapered sides and sloped floors. This shape aids in self cleaning and take full advantage of the non-clog pumps we have installed. This will vastly reduce and hopefully eliminate the cleaning projects that now have to be done each year.

Safety and security enhancements will also be made to the electrical and switch components by enclosing them in lockable structures. The end result is increased reliability, reduced maintenance, and increased safety and security.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund					1,000,000		1,000,000

Operating Budget Impact

Addition of the crane at this location would eliminate crane rentals.

Vehicle

Oak Lodge Water Services District has 35 pieces of rolling stock. 15 primarily used for the water, 16 for sewer and 3 for storm and 1 for Technical Services inspections. This program aims to systematically set aside funds at a predictable rate, that not only gives the Board a snapshot of the current fleet, but it also allows staff to show the Board in a single document the intended replacement schedule of each piece of equipment.

With regular and scheduled replacement of vehicles, the cost for major repairs should be kept to a minimum. In addition, the timing for replacements can occur in a planned, efficient and effective fashion thus evening out costs.

For the first couple of years the District would need to catch up to meet the scheduled replacements because the newly created Capital Fund has no pre-existing reserves built up.

Vehicle Capital Purchases

Page	ID#	Program	Vehicle Description	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	Totals
27	NEW	Wastewater	Plant Operations Motorized Cart	20,000						\$ 20,000
27	58	Water	Field Operations Van	35,000						\$ 35,000
28	2	Wastewater	Plant Operations Truck		32,000					\$ 32,000
28	8	Technical Services	Inspection Truck		35,000					\$ 35,000
29	30	Water	Operations Dump Truck			110,000				\$ 110,000
29	64	Water	Field Operations Truck					35,000		\$ 35,000
30	55	Water	Field Operations Truck					35,000		\$ 35,000
30	68	Water	Field Operations Truck					35,000		\$ 35,000
31	15	Wastewater	Plant Operations Truck						37,000	\$ 37,000
31	16	Wastewater	Plant Operations Truck						90,000	\$ 90,000
Total Vehicle Capital Expenses				\$ 55,000	\$ 67,000	\$ 110,000	\$ -	\$ 105,000	\$ 127,000	\$ 464,000

Capital Replacement

Plant Operations Motorized Cart

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund	20,000						20,000

Operating Budget Impact

This purchase will add one more fleet vehicle to the District’s inventory. It will be put on a replacement schedule and budgeted for accordingly.

Replacement of Vehicle #58

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund	35,000						35,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Vehicle

Replacement of Vehicle #2

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund			32,000				32,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Replacement of Vehicle #8

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund			35,000				35,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Capital Replacement

Replacement of Vehicle #30

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund			110,000				110,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Replacement of Vehicle #64

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund					35,000		35,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Vehicle

Replacement of Vehicle #55

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund					35,000		35,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Replacement of Vehicle #68

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund					35,000		35,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Capital Replacement

Replacement of Vehicle #15

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund						37,000	37,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Replacement of Vehicle #16

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Wastewater Capital Fund						90,000	90,000

Operating Budget Impact

Since newer vehicles should have lower maintenance costs and repair frequencies, replacement of this vehicle should not increase the overall operating budget.

Overview

The District’s water distribution system is primarily comprised of 6-inch and 8-inch cast and ductile iron pipe. The District has concentrated on eliminating many sections of 2-inch pipe and looping dead-ends wherever practical. In the past the District had spent on average \$500,000 annually on water capital, however beginning this year this number has been increased to over \$1,000,000 to keep up with water capital needs.

OLWSD has more than sufficient storage with two 5 million gallon reservoirs at the Valley View site and two 2.8 million gallon reservoirs at the View Acres site to supply the system. However, the Valley View Reservoirs are also used as the storage source to serve the Sunrise Water Authority. This update will include an analysis to determine that fire flows for Oak Lodge Water Services District can continue to be met under this operational scenario.

This year, along with the completion of a Master Plan, the Board will help staff prioritize which capital projects to focus on first.

Water Capital Improvement Projects

Page	Project Name	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	Totals
33	Water Resiliency Plan	100,000						\$ 100,000
33	Intertie Project Design	100,000						\$ 100,000
34	Partridge Circle Main Replacement	325,000						\$ 325,000
34	Capital Project Place Holder #1	955,000						\$ 955,000
35	Decant Facility		120,000					\$ 120,000
35	Capital Project Place Holder #2		1,200,000					\$ 1,200,000
36	Capital Project Place Holder #3			1,200,000				\$ 1,200,000
36	Capital Project Place Holder #4				1,200,000			\$ 1,200,000
37	Capital Project Place Holder #5					1,200,000		\$ 1,200,000
37	Capital Project Place Holder #6						1,200,000	\$ 1,200,000
Total Water Capital Expenses		\$ 1,480,000	\$ 1,320,000	\$ 1,200,000	\$ 1,200,000	\$ 1,200,000	\$ 1,200,000	\$ 7,600,000

Water Resiliency Plan

On October 23, 2018, America’s Water Infrastructure Act (AWIA) was passed, tasking the United States Environmental Protection Agency (EPA) with enforcing community water systems serving more than 3,300 people to conduct Risk and Resiliency Assessments and to develop an Emergency Response Plan. The District’s compliance deadline for completing the AWIA Risk and Resilience Assessment is June 30, 2021.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund	100,000						100,000

Operating Budget Impact

The creation of document itself will not add or subtract to operational budget. However, it will likely identify needs for the District that will be discussed in future budgets.

Intertie Project Design

Currently, Oak Lodge Water Services relies solely on the Clackamas River for its water needs. During the Water Master Plan process, Staff discussed with the Board the need to create additional options in the event that the Clackamas River is not available. An example of this could be low summer flows or a toxic algal bloom.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund	100,000						100,000

Operating Budget Impact

Once constructed, this project will add infrastructure to the Oak Lodge Water Services District inventory and thus increase overall maintenance in the Operating Budget.

Partridge Circle Main Replacement

In the past, field staff had concerns with this main because the earth around the main has continued to move (or slide). But in more recent past, Partridge Circle was found to be prematurely wearing as a result of electrolysis. It was the combination of these two issues that caused staff to change this project to high priority.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund	325,000						325,000

Operating Budget Impact

This project will replace aging infrastructure and will reduce the overall risk of pipe failures.

Capital Project Placeholder #1

Since the Water Master Plan is in the process of being completed and will likely create projects that need to be planned, this “project” is a placeholder to make it clear that there will likely be spending beyond the Master Plan and Water Meter Replacement program within the next 6 years.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund	955,000						955,000

Operating Budget Impact

This project will replace aging infrastructure and will reduce the overall risk of pipe failures.

WRF Decant Expansion

Decant facilities are used to remove water from excavated material so that hauling and disposal costs can be minimized.

The goal of this project is to provide enough capacity for all three utilities to utilize after removing the decant facility at the Administrative Office (14496 SE River Road).

The payment for this project will be split evenly across all three utilities.

<u>Funding Source</u>	<u>FY 2019</u>	<u>FY 2020</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>Total</u>
Water Capital Fund	10,000			120,000			130,000

Operating Budget Impact

Completion of this project will allow for draining of water from wet soils, thus reducing hauling and disposal costs of soils. It will also allow for temporary storage when hauling isn't available, thus enabling staff to continue working on projects with little delay.

Capital Project Placeholder #2

Since the Water Master Plan is in the process of being completed and will likely create projects that need to be planned, this "project" is a placeholder to make it clear that there will likely be spending beyond the Master Plan and Water Meter Replacement program within the next 6 years.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund		1,200,000					1,200,000

Operating Budget Impact

This project will replace aging infrastructure and will reduce the overall risk of pipe failures.

Capital Project Placeholder #3

Since the Water Master Plan is in the process of being completed and will likely create projects that need to be planned, this “project” is a placeholder to make it clear that there will likely be spending beyond the Master Plan and Water Meter Replacement program within the next 6 years.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund			1,200,000				1,200,000

Operating Budget Impact

This project will replace aging infrastructure and will reduce the overall risk of pipe failures.

Capital Project Placeholder #4

Since the Water Master Plan is in the process of being completed and will likely create projects that need to be planned, this “project” is a placeholder to make it clear that there will likely be spending beyond the Master Plan and Water Meter Replacement program within the next 6 years.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund				1,200,000			1,200,000

Operating Budget Impact

This project will replace aging infrastructure and will reduce the overall risk of pipe failures.

Capital Project Placeholder #5

Since the Water Master Plan is in the process of being completed and will likely create projects that need to be planned, this “project” is a placeholder to make it clear that there will likely be spending beyond the Master Plan and Water Meter Replacement program within the next 6 years.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund					1,200,000		1,200,000

Operating Budget Impact

This project will replace aging infrastructure and will reduce the overall risk of pipe failures.

Capital Project Placeholder #5

Since the Water Master Plan is in the process of being completed and will likely create projects that need to be planned, this “project” is a placeholder to make it clear that there will likely be spending beyond the Master Plan and Water Meter Replacement program within the next 6 years.

<u>Funding Source</u>	<u>FY 2021</u>	<u>FY 2022</u>	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>Total</u>
Water Capital Fund						1,200,000	1,200,000

Operating Budget Impact

This project will replace aging infrastructure and will reduce the overall risk of pipe failures.

OAK LODGE WATER SERVICES DISTRICT

FY 2020-21 Proposed Budget Highlights

- ▶ Stable service levels
- ▶ PERS contribution - \$900k
- ▶ Anticipate Water Master Plan capital expenditures
- ▶ Targeted fund balances/reserves
- ▶ Utility rate study
- ▶ Emergency rate relief program
- ▶ Labor negotiations

PROPOSED BUDGET

- ▶ Operating funds – 13.7% increase in expenditures
 - ▶ \$9.5M to \$10.8M
- ▶ Transfers to capital to fund current projects
 - ▶ \$500k water
 - ▶ \$1M wastewater
 - ▶ \$500k watershed protection
- ▶ Target fund balances at 25% per financial policies
- ▶ Resources to balance

PROPOSED BUDGET

Proposed rate increases:

- ▶ Water rate increase 2020-21 4.5%
